

Woodland Public Schools
Where Community & Learning Connect

As you know, one of the critical needs of Woodland Public Schools is a **new high school** at some point in the near future. Although the board has not made a decision as to when a bond measure might go before voters, they would like to hear your opinion on which of the following two sites you think would make the best choice. Please read the following information about each site and then indicate which site you believe is best suited for a new high school.

Dike Access Road Site

Estimated Development Time: 48 months • 2008 cost estimate: \$57.95 million

PROS »

- Space for future expansion as Woodland grows
- Possible cost-sharing with neighboring properties under construction
- Traffic flow for students, staff, and visitors improved over current site

CONS »

- Wetlands on site will require mitigation
- Extensive site preparation will be necessary
- Will require more extensive off-site road and frontage improvements than the current site

Current Site

Estimated Development Time: 42 months • 2008 cost estimate: \$55.8 million

PROS »

- Allows for the option to reuse and shared use of some existing facilities
- Potential for lower operating costs because of fewer grounds to maintain
- Will likely require no wetland mitigation or extensive site preparation.

CONS »

- No space for future expansion as Woodland grows
- May require relocation of current KWRL bus facility
- May require replacement of 1 or 2 existing sewer pump stations

I favor building a new high school on the existing site. Here's why:

I favor building a new high school on the Dike Access Road site. Here's why:

I do not favor building a new high school at all. Here's why:

Please stamp and mail or return to any Woodland school or the district office.
