To:
Superintendent Michael Z. Green
Woodland School District Board of Directors

On behalf of the students and staff of Yale Elementary School, we want to take a moment to thank Superintendent Michael Green, the Woodland School District Board of Directors, and the entire district community for their support of our students and schools.

The new gym will be a huge asset to our school and will provide our students with a safe, comfortable, and practical learning space for decades to come. The students and families love the new building and we are excited to use it for physical education, school activities, hands-on science, math and social studies learning opportunities, drama, music, and community events.

Our entire school district community was vital in every phase of this project and we owe everybody a huge debt of gratitude for their support.

We also want to thank our Superintendent, Michael Green, for his professionalism, hard work, and commitment to this project. From meeting with the community to address our unique needs, to working on Saturday in the rain, his dedication towards this project is very much appreciated.

In addition, we want to thank the Woodland School District Board of Directors for their continued support of our unique school, their professionalism, and commitment to this project.

Finally, we are also very appreciative of the project architect, Eric Lanciault, and the contractor, Five Rivers Construction. Both worked hard to design and build an amazing gymnasium that our students and community love.

The reactions and looks on our students' faces upon seeing the completed gym were priceless! We are thankful to everybody who contributed to this magnificent project. We are excited to use the gymnasium for decades to come. Thank you!

Sincerely,

Kyle Niekamp & Veronica Cortez
Yale Elementary School
