

Response to Student Injury or Illness

~~EMERGENCY TREATMENT~~

The board recognizes that schools are responsible for providing first aid or emergency treatment in case of ~~injury or sudden~~ illness ~~of or injury to~~ a student. ~~To, but that end, the board encourages school staff to become certified in first aid. Further~~ the board encourages school staff to become certified in first aid. ~~Further~~ medical attention in non-emergency cases is the responsibility of the parent or guardian. Schools will notify the parent or guardian of students who suffer injuries, illness or physical trauma at school or at any school-sponsored activity as soon as practicable.

-

~~When a student is injured it is the responsibility of staff to see that immediate care and attention is given the injured party until relieved by a superior, a nurse or a doctor. Word of the accident should be sent to the principal's office and to the nurse. The principal or designated staff should immediately contact the parent so that the parent can arrange for care or treatment of the injured.~~

~~In the event that the parent or emergency contact cannot be reached and in the judgment of the principal or person in charge immediate medical attention is required, the injured student may be taken directly to the hospital and treated by the physician on call. However, an injured or ill student should only be moved if a first aid provider has determined that it is safe to do so, or that it is safe to transport the student in a private vehicle. Students with head or neck injuries should only be moved or transported by emergency medical technicians. When the parent is located, he/she may then choose to continue the treatment or make other arrangements.~~

~~The district is not qualified under law to comply with directives to physicians limiting medical treatment and will not accept such directives.~~

The ~~superintendent shall establish~~ following procedures ~~to will~~ be followed in any accident, and for providing first aid or emergency treatment to a student who is ill or injured.

EVALUATION

When a student is injured or ill at school or during any school-sponsored activity to any degree, it is the responsibility of staff to see that immediate care and attention is provided to the student unless or until the staff member is relieved by a staff member certified in first aid, a nurse, a doctor, or emergency personnel.

Except in cases of very minor injuries (e.g., cuts, scrapes, rug burns) that, in the judgment of the school nurse or a staff member certified in first aid, do not pose a serious health risk to the student and will not worsen if the student remains at school, the principal or designee and school nurse (if not already notified) will be promptly notified of any student's: 1) injury; 2) illness; or 3) physical trauma that could have caused injuries yet unobservable.

The school nurse or staff member will determine whether the injury, illness or trauma is serious enough to warrant calling 911. If there is any doubt, 911 should be called. If 911 is not called appropriate staff will provide appropriate first aid to the student consistent with their training.

EMERGENCY TREATMENT

Students with uncontrolled bleeding and those who have suffered temporary suffocation, cardiac arrest, fractures or head, neck, eye, ear, or spinal injuries will only be moved and transported by EMS.

PARENT/GUARDIAN OR EMERGENCY CONTACT NOTIFICATION

Except in cases of very minor injuries as described above, the principal or designee will notify the parent or guardian (or, if the parent or guardian cannot be reached, the emergency contact), to advise them of the student's condition as soon as practicable.

The student's parent or guardian or emergency contact will decide, in non-emergency cases, whether: 1) the parent/guardian or emergency contact will transport the student to the hospital; 2) the parent/guardian or emergency contact will pick up the student or 3) the student will remain at school.

ADVANCED DIRECTIVES

The district will consult with its legal counsel prior to accepting any advance directives to physicians to limit medical treatment.
