It would have been nice to work with a veteran teacher from our grade during the curriculum overview.	-The pacing of the curriculum vs. time allotted in the daily schedule. -Getting necessary instructional materials for core curriculum.

Honestly, I can't think of one thing I would change.	As questions come up - I know who to talk to or where to find the answer. The challenges I have are mostly with technology in my classroom (hitachi board software) and finishing the last few things before the first day... All completely manageable.

If possible (?) give a general overview based on buildings what type of things our budget should be used for. Ie; ALL classroom supplies, any field trips that may have been taken in past years, science kits... just so that I am able to have a general understanding of expenses that may come up.	None right now! Thank you for an overwhelming supportive first week. I am so thankful to be a part of the Woodland family!

I really appreciated the tour of the campuses as well as some of Woodland. It is important to me to know where my students and their families live and what the community looks like. I also appreciated Michael and Asha's presence during the training. Their presence and participation was a huge factor in helping me realize that I chose the right school district.	The business office ran through things rather quickly. It would be more helpful for them to slow it down a bit when presenting insurance and all the dates we need to have things turned in by.

I'm still a little concerned about what the first few days are supposed to look like and how to introduce the curriculum to the students. Also, what are the typical procedures for Drop In Drop Out? Are there certain PBIS posters that are available through the school? Such as Voice Level and Whole Body Listening? Who is my mentor?

I was able to really invest it in my classroom since it was funds I didn't plan on having. Other than that, the time to collaborate with other teachers as well as Woodland Staff was really helpful in the sense that we got to network a little and start building professional relationships to utilize throughout the year.
