## 2019 Capital Facilities Plan

- Add $4^{\text {th }}$ Elementary School
- 450-500 Student Enrollment
- Reconfigure to Elementary Schools to serve students in Kindergarten through Grade 5
- Elementary School Capacity until 2024
- Reconfigure to 6-8 Middle School to serve students in grades six, seven, and eight.
- Middle School Capacity beyond projected future (2024)

## K-5 Student Capacity with 4th Elementary School

## 6-8 Student Capacity with 4th Elementary School

Chart Uses 2018 CFP Projections

## Expected Growth....

- The Projections are based on historical rates of growth
- Historical Growth rate about 1.5-2\% growth year over year
- Arithmetic Models fairly good at predicting future enrollment
- E.D. Hovee \& Company Enrollment Analysis \& Forecast Scenarios (1/2019)
- About 1000-2000 homes over the next 8-10 years
- IF these developments materialize we anticipate a significant increase in student enrollment at a rate that surpasses the arithmetic models.
- Best tool to estimate impact is the "Student Generation Rate" (SGR)
- SGR looks at historical data to determine how many students come with new housing
- SGR update in 2018
