RE: TEAM High School  
Date: June 3, 2009

For the 2009-2010 school year, TEAM High School will be operating with a new computer program called APEX. It is much better than NOVANet in the fact that it is more interactive, more user friendly and can be accessed by other students in our school district. Also, the Cowlitz County Juvenile Detention Center has switched from NOVANet to APEX because of the reasons listed above and other detention centers around the state have converted.

Another change that we hope will occur for next year is more computers being installed at TEAM thereby allowing us to serve more students and not have them drop out of our schools completely. As it is right now we serve close to 80 students and would like to increase our numbers.
